

Assisted Living Residence
Long-Term Care • Sub-Acute Care

September 14, 2020

Dear Residents and Families:

My last communication stated that our weekly testing results showed another asymptomatic staff member, test positive for COVID-19. Last week's weekly testing of staff turned up no other asymptomatic employees that tested positive for COVID-19.

Therefore, our current numbers for this new outbreak remain as follows:

0 residents who have tested positive for COVID 19
5 center staff that have tested positive for COVID 19
0 residents have passed away due to COVID 19 during this pandemic
0 center staff has passed away due to COVID 19 during this pandemic

This still means that we are still in Phase Zero and must remain closed to all visitors. We cannot reopen to any form of visitation until we are permitted by the local and state Departments of Health.

I understand that this is frustrating that we are back to Phase Zero, but it is necessary due to the frail population that we serve and to try to protect them as best as possible. Please remember that you can call to set up either a FaceTime visit or "breezeway visit" Monday through Friday, unless the resident is under their initial 14 day quarantine from admission.

I am always available to discuss the numbers in general terms since I must maintain our resident's and staff's privacy.

Please feel free to reach me at 973-743-0792 with any concerns or questions, and please stay safe!

David Repoli, LNHA
Administrator
